

## TESTIMONIALS

"I first started using Ferox Fleet Services back in December of 2017. They performed the maintenance needed completely in fast and professional matter. Since that time, I have had many issues with the truck and have continued to use them for my maintenance needs. At all times they are professional and complete the work in a timely fashion. I highly recommend them for all your equipment needs. The team is fair and honest and will always stand behind their work. They do not use cheap parts that will fail and bring you back. They use quality parts and want your future business. Everyone I have referred is extremely pleased with their work. Do yourself a favor and get to know these folks." -Mitchell Bros.

"If you don't use Ferox Fleet Services all I can say is sorry you're missing out on a quality shop to take your equipment too. I will be a loyal customer until I retire. Thanks to the guys at Ferox Fleet Services for all the fine work you have done for me. You guy's rock." -Glenn H.
